

# **AERO-MARINE TECHNOLOGIES, INC.**

*When Service and Experience Matter*

Aero-Marine Technologies overhauled this 14330-375 unit back in 2016. This week it arrived back for routine maintenance. After three years in service, this vacuum generator looks almost as good as did when it left our shop three years ago.

Our experience shows the average life of an OEM vacuum generator to be 12-18 months between overhauls. Our warranty at Aero-Marine Technologies is a full 24 months.

AMT's life-extending maintenance procedures result in longer on-wing time and cost savings to our customers. Send us your next unit and see why Aero-Marine Technologies' overhauls are the best in the business.

Aero-Marine Technologies specializes in the repair and overhaul of all common vacuum generators including:

**606802-2 | 14330-375  
14330-350 | J540A14-100  
645172-2**
